REPORTS FOR STATES, WITH STATISTICS FOR
COUNTIES

AND A SUMMARY FOR THE UNITED STATES
AND THE NORTH, SOUTH, AND WEST

THE SOUTHERN STATES

(9)

SUMMARY FOR THE NORTH, THE SOUTH, AND THE WEST.

This brief summary of the main items of the 1920 farm census presents totals for the three great sections into which the country may conveniently be divided, namely, the North, the South, and the West. For explanation of terms and other supplementary matter reference may be made to the introduction to this volume, pages 11 to 14.

The geographic divisions and states which make up each of the three sections for which totals are presented herewith are given below, and the sections are shown on the accompanying map. Figures for these geographic divisions and states may be found in the detailed tables of the Summary for the United States, on pages 30 to 84.

THE NORTH.		THE SOUTH.		THE WEST.
NEW ENGLAND DIVISION.	EAST NORTH CENTRAL DIVISION.	SOUTH ATLANTIC DIVISION.	EAST SOUTH CENTRAL DIVISION.	MOUNTAIN DIVISION.
Maine. New Hampshire. Vermont. Massachusetts. Rhode Island. Connecticut.	Ohio. Indiana. Illinois. Michigan. Wisconsin.	Delaware. Maryland. District of Columbia. Virginia. West Virginia. North Carolina. South Carolina. Georgia. Florida.	Kentucky. Tennessee. Alabama. Mississippi.	Montana. Idaho. Wyoming. Colorado. New Mexico. Arizona. Utah. Nevada.
MIDDLE ATLANTIC DIVISION.	WEST NORTH CENTRAL DIVISION.		WEST SOUTH CENTRAL DIVISION.	PACIFIC DIVISION.
New York. New Jersey. Pennsylvania.	Minnesota. Iowa. Missouri. North Dakota. South Dakota. Nebraska. Kansas.		Arkansas. Louisiana. Oklahoma. Texas.	Washington. Oregon. California.

¹ Value of milk, cream, and butter fat sold, and of butter and cheese made on farms.

² Estimates have been made for incomplete reports, as where a farmer reported dairy cows but no milk production, or chickens but no egg production. Chicken eggs and chickens for 1909 also involve estimated deductions from the published figures of the Thirteenth Census, which included all eggs and all kinds of fowls raised.

³ Value of all eggs produced. The estimated value of chicken eggs produced in 1909 in the United States was \$303,296,012; in the North, \$203,173,243; in the South, \$74,299,535; and in the West, \$25,823,234.

⁴ Value of all fowls raised. The estimated value of chickens raised in 1909 in the United States was \$184,902,527; in the North, \$120,491,785; in the South, \$53,397,425; and in the West, \$11,013,317.

GEORGIA.

INTRODUCTION.

In the following pages are presented all the statistics of agriculture for Georgia collected at the census of 1920, except a few minor items which are given in the state tables of the United States summary, at the beginning of this volume, and certain detailed tabulations which appear in Volume V of the Fourteenth Census Reports. The statistics of farms and farm property, including live stock, relate to January 1,

1920; those of live-stock products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

FARMS AND FARM PROPERTY.

Implements and machinery.....	2.49	0.78	1.71	219.2
Live stock.....	6.09	2.98	3.11	104.4

¹ A minus sign (-) denotes decrease.

² Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 2,039,497. For this territory, the increase in population between 1910 and 1920 was 6.3 per cent, which percentage indicates the rate of growth of the rural population, leaving out of consideration the changes in classification of territory.

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

Farm.—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least \$250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

Farmer.—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

Farm owners include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

Managers are farmers who are conducting farm operations for the owner for wages or a salary.

Farm tenants are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as \$7 per acre of crop land or \$500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

Farm land.—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

Improved land includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

Woodland includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

All other unimproved land includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

TABLE 7.—NUMBER OF FARMS AND PER CENT DISTRIBUTION, BY SIZE: 1880 TO 1920.

SIZE GROUP.	NUMBER OF FARMS.				
	1920	1910	1900	1890	1880
Total number of farms.....	310,732	291,027	224,691	171,071	138,626
Under 10 acres.....	6,365	8,700	6,055	4,438	3,211
10 to 19 acres.....	20,604	20,929	13,301	10,868	8,694
20 to 49 acres.....	134,471	117,432	73,408	55,287	36,524
50 to 99 acres.....	81,112	68,510	52,251	32,316	26,054
100 to 499 acres.....	63,936	69,985	73,100	59,343	53,635
500 to 999 acres.....	3,091	3,950	4,718	6,061	7,017
1,000 acres and over.....	1,153	1,521	1,858	2,758	3,491
Per cent of all farms.....	100.0	100.0	100.0	100.0	100.0
Under 10 acres.....	2.0	3.0	2.7	2.6	2.3
10 to 19 acres.....	6.6	7.2	5.9	6.4	6.3
20 to 49 acres.....	43.3	40.4	32.7	32.3	26.3
50 to 99 acres.....	26.1	23.5	23.3	18.9	18.8
100 to 499 acres.....	20.6	24.0	32.5	34.7	38.7
500 to 999 acres.....	1.0	1.4	2.1	3.5	5.1
1,000 acres and over.....	0.4	0.5	0.8	1.6	2.5

TABLE 8.—FARM ACREAGE AND VALUE, BY SIZE OF FARM: 1920 AND 1910.

SIZE GROUP (ACRES).	ALL LAND IN FARMS (ACRES).		IMPROVED LAND IN FARMS (ACRES).		VALUE OF LAND AND BUILDINGS.	
	1920	1910	1920	1910	1920	1910
Total.....	25,441,061	26,953,413	13,055,209	12,298,017	\$1,185,398,627	\$479,264,332
Under 20.....	335,365	348,103	312,835	327,212	38,409,506	19,929,323
20 to 49.....	4,189,977	3,709,289	3,613,514	3,318,067	267,507,035	96,117,977
50 to 99.....	5,304,281	4,553,682	3,516,013	2,968,547	295,694,028	102,927,993
100 to 174.....	5,047,941	5,223,132	2,403,565	2,367,863	215,069,955	92,772,819
175 to 499.....	6,012,790	7,412,598	2,113,672	2,288,329	202,073,127	102,831,020
500 to 999.....	1,995,069	2,604,839	597,163	595,659	60,822,694	32,471,115
1,000 and over.....	2,555,648	3,101,872	498,447	432,340	58,822,287	32,154,085

TABLE 9.—PER CENT OF FARM LAND IMPROVED, AND AVERAGE VALUES, BY SIZE OF FARM: 1920 AND 1910.

SIZE GROUP.	PER CENT OF FARM LAND IMPROVED.		AVERAGE VALUE OF LAND AND BUILDINGS.			
	1920	1910	Per farm.		Per acre.	
			1920	1910	1920	1910
Total.....	51.3	45.6	\$3,568	\$1,647	\$44.74	\$17.78
Under 20 acres.....	93.3	94.0	1,424	673	114.53	57.25
20 to 49 acres.....	86.2	89.5	1,989	818	63.84	25.91
50 to 99 acres.....	66.3	65.2	3,644	1,502	55.73	22.60
100 to 174 acres.....	47.6	45.3	5,222	2,195	42.61	17.76
175 to 499 acres.....	35.2	30.9	8,881	3,711	33.61	13.87
500 to 999 acres.....	29.9	22.9	19,677	8,221	30.49	12.47
1,000 acres and over.....	19.5	13.9	51,017	21,140	23.02	10.37

FARMS BY TENURE.

TABLE 10.—NUMBER OF FARMS, BY TENURE AND COLOR OF FARMER: 1920 AND 1910.

COLOR AND TENURE.	NUMBER OF FARMS.		INCREASE. ¹		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
All farmers.....	310,732	291,027	19,705	6.8	100.0	100.0
Owners.....	102,123	98,628	3,495	3.5	32.9	32.9
Owning entire farm.....	94,575	88,768	5,807	6.5	30.4	30.5
Hiring additional land.....	7,548	9,860	-2,312	-23.4	2.4	3.4
Managers.....	1,655	1,419	236	16.6	0.5	0.5
Tenants.....	206,954	190,980	15,974	8.4	66.6	65.6

LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

Domestic animals: 1920 and 1910.—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

Dairy cows: 1920 and 1910.—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers not kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as kept for milk, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Georgia the number of "dairy cows," including heifers 1 year old and over, reported for January 1, 1920, was 484,122, as compared with 405,710 "cows

kept for milk" reported for April 15, 1910. This represents an increase of 78,412, or 19.3 per cent. The number of "beef cows" reported for January 1, 1920, was 282,067, as compared with 245,303 "cows not kept for milk" reported for April 15, 1910, representing an increase of 36,764, or 15 per cent. The percentage of increase shown for dairy cows would have been even larger, except for the change in classification mentioned above, and the percentage of increase shown for beef cows correspondingly smaller.

Farms reporting domestic animals: 1910.—Horses were reported by 87,257 farms in Georgia in 1910, mules by 186,512 farms, cattle by 213,203, sheep by 5,167, and swine by 213,447. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Georgia increased from 291,027 in 1910 to 310,732 in 1920.

LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are

more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows some time during the year 1919 but had none on January 1, 1920.

CROPS.

Summary: 1919 and 1909.—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, except that it does not include nursery or greenhouse products or forest products of farms.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Georgia in 1919 for which the acreage was reported was 10,468,834, which represents 80.2 per cent of the total improved land in farms (13,055,209 acres). The total crop acreage reported for 1909 was 9,660,737, or 78.6 per cent of the improved land in farms (12,298,017 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 500,672 acres of mature crops grazed or "hogged off" and 523,690 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

Farm value of crops.—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

CROP.	FARMS REPORTING.				ACRES HARVESTED.			PRODUCTION.

¹ A minus sign (-) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.
² Excluding 728,844 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.
³ The 1909 figures include small quantities of emmer and spelt and of kafir and milo.
⁴ Less than one-tenth of 1 per cent.
⁵ Principally oats and peas grown and harvested together.
⁶ Includes small quantities of sorghum seed (1919 and 1909) and of flaxseed and velvet beans (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops, is probably a duplication of other crop acreage.

⁷ Includes small quantities of flower and vegetable seeds (value only) and of millet seed. The entire acreage from which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.
⁸ Corn cut for forage was not reported to any extent in 1909; hence no fair comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.
⁹ Includes millet and Hungarian grass.
¹⁰ The 1919 figures represent vegetables raised for sale only.
¹¹ In 1909 the value of the farm garden was largely included in the value of "other vegetables."
¹² These crops comprise broom corn and chufas (1919 and 1909), and ginseng (value only, 1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn.....	4,280,455	3,383,061	3,477,684	2,582,316	2,538,733

Cotton.....	4,720,498	4,883,304	3,513,839	3,245,104	2,617,138

¹ Includes 728,844 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 519,970 acres.
