Note: See appendix A for an explanation of terms used. The following variations in definitions of terms should be considered in the use of this table: **All employees:** For 1949 to 1954, figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947, an average of 12 monthly figures for all employees; and for 1939 and prior years, the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years, figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1956 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work in process during the year.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

¹The 1958 and subsequent years figures include establishments classified in industry 3273, Ready Mixed Concrete, and establishments classified in industry 3599, Miscellaneous Machinery, that were engaged exclusively or almost exclusively in machine shop repair work. The data for such establishments are excluded from the figures for the period 1939 to 1957, but are included for 1929 and earlier years. The 1954 to 1963 figures include data for establishments engaged in the processing and distribution of fluid milk, industry group 202, Dairies. These establishments were not included in the figures for earlier census years. In addition, beginning with 1954, the figures include data for Logging Camps and Contractors, industry 2411, which were not included within the scope of the 1947 census. There were also a number of changes in the definition of manufacturing industries during earlier census years that affect the compar-

ability of the historical series. Among the more important of these were the following: Figures for 1935 and later years exclude data for railroad repair shops and manufactured gas which were included in 1899 to 1933 figures; the minimum size of establishment included for 1947 to 1963 was 1 employee; for 1921 to 1939, manufacturing establishments reporting value of shipments of \$5,000 or more were within scope whereas for 1919 and earlier years the cutoff was \$500. (These changes in procedure have not appreciably affected the comparability of the historical data except for the figures on number of establishments.)

²Employment and payroll totals for central administrative offices and auxiliaries are included in the statistics shown for the years 1954 to 1963. Prior to 1954, this information was not available. The "number of establishments with 20 or more employees" total for 1958 and all previous years and "total number of establishments" total for 1954 and previous years does not include data for central administrative offices and auxiliaries.

³For the years 1958 to 1963, includes expenditures for plants under construction but not in operation in addition to expenditures at operating manufacturing establishments. Prior to 1958, the data represents expenditures at operating manufacturing establishments only.

⁴The data for 1955 to 1957 and 1959 to 1962 are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The sampling variability of these estimates is published in the Annual Survey of Manufactures volumes for the respective periods.

--	ADMINISTRATIVE AND AUXILIARY . .	78	27	4 328	32 399	-	-	-	-	-	-	1 738	-

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

¹In order to avoid disclosing figures reported by individual companies the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups showing less than 100 employees are also omitted. They

are included, however, in the appropriate 2-digit industry group line and "all industries, total."

²The total value of shipments figures for industry groups have not been published because of extensive and unmeasurable duplication arising from shipments from one establishments to another in the same industry classification (see introduction).

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.
 n.e.c. Not elsewhere classified.
 In order to avoid disclosing figures reported by individual companies the statistics for some industries (4-digit) and industry groups (3-digit) are not shown. Industries and industry groups showing less than 100 employees are also omitted. They

are included, however, in the appropriate 2-digit industry group line and "all industries, total."
 The total value of shipments figures for industry groups have not been published because of extensive and unmeasurable duplication arising from shipments from one establishment to another in the same industry classification (see introduction).
